

Mr. Vaibhav Sharma is currently an Assistant Professor at ICFAI Business School, ICFAI University, Dehradun. He qualified GATE in 2012 and 2016 and received a scholarship from the MoE, GOI. He has recently submitted his thesis and is awaiting his defense at Malaviya National Institute of Technology (MNIT), Jaipur, where he investigated the role of Industry 4.0 technologies for evaluating trust in the supply chain. He has more than 5 years of teaching experience in academics. His research focuses on leveraging digital technologies to improve supply chain performance, resilience, and organizational decision-making, addressing challenges in supply chain management and digital in-

novation. He has authored scholarly publications in reputed journals indexed in Web of Science and Scopus, as well as in Scopus-indexed conferences, and received best paper awards. His research aims to bridge the gap between theoretical advancements and industry practices by providing evidence-based insights for organizations navigating digital transformation. Through his research, he aims to advance the adoption of intelligent and sustainable technologies that enhance collaboration, trust, and decision-making across complex supply chain ecosystems. Beyond research and teaching, he actively contributes to the academic community as a reviewer for several reputed international journals and conferences. He has also filed an Indian patent and has participated in numerous funded workshops and faculty development programmes. His professional development includes certification as a Lean Consultant under the Ministry of MSME, Government of India, along with specialized training in digital supply chain twins, operations analytics, and Industry 4.0 technologies.
